Présentation

Objectives

The objective of this program is to enable students to acquire the knowledge and skills required to master the methods, tools, and concepts of Market Access (MA) and Health Economic Outcomes Research (HEOR) as applied to drugs and medical devices.

The curriculum covers the economic environment of healthcare products, the funding and regulation of healthcare expenditures, healthcare institutions, MA and HEOR applied to drugs and medical devices (MDs), as well as the MA of special products (vaccines, biosimilars, e-health, telemedicine, etc.).

Throughout the Master's program, students complete their training under an apprenticeship scheme (1 week of classes / 3 weeks in the workplace), working in pharmaceutical companies, MD manufacturers, consulting firms, institutions, or hospitals. This format allows them to directly apply the knowledge acquired in class.

The identity of the program is strongly rooted in hands-on learning through numerous case studies and group projects. Over the course of the year, every student must prepare a Therapeutic Interest Note (transparency dossier) and conduct an HEOR efficiency dossier. Students also practice strategic MA, where they learn how to position their product and defend their strategy. They participate in a negotiation seminar to develop familiarity with negotiation stances and language.

Each year, the entire cohort attends the ISPOR (International Society for Pharmacoeconomics and Outcomes Research) Congress for five days, where the latest economic developments and innovations in MA and HEOR are presented. This provides students with the opportunity to immerse themselves in a specialized international environment and expand their professional network.

Finally, students are required to write a Master Thesis on a specific MA or HEOR issue, following the structure of a research paper (introduction, research question, methodology, results, discussion, and conclusion). The preparation of scientific articles is also encouraged.

These competencies open up career opportunities in the pharmaceutical industry and across the broader healthcare sector, in departments dedicated to economic affairs.

Calendar

Start of programme (indicative date)
20/09/2026
End of programme (indicative date)
30/09/2027
Admission

Capacity

From 09/02/2026 to 10/04/2026

Supporting documents

Compulsory supporting documents

Motivation letter.

All transcripts of the years / semesters validated since the high school diploma at the date of application.

Curriculum Vitae.

Detailed description and hourly volume of courses taken since the beginning of the university program.

Additional supporting documents

List of post-secondary school studies mentioning exclusively the year, course, institution, average grade and your grade or distinction.

Supporting documents (TOEFL, TOEIC, certificate of a teacher ...) of a level of a foreign language.

Letter of recommendation from a trainee.

Pharmacy or engineer transcripts.

Certificate of English level.

Certificate of French (compulsory for non-French speakers).

Level B2 required

VAP file (obligatory for all persons requesting a valuation of the assets to enter the diploma).

Supporting documents :
- Residence permit stating the country of residence of the first country
- Or receipt of request stating the country of first asylum
- Or document from the UNHCR granting refugee status
- Or receipt of refugee status request delivered in France
- Or residence permit stating the refugee status delivered in France
- Or document stating subsidiary protection in France or abroad
- Or document stating temporary protection in France or abroad.
