M2 Human Toxicology, Risk Assessment and Vigilance (THERV) - Work-study programme

Master's degree

Specialisation Pharmaceutical Science

Enrolment type

Formation en apprentissage

Language(s) of instruction

English

French

Multidisciplinary in nature, toxicology is a rare cross-disciplinary field that combines medicine, biology, chemistry, and environmental sciences. The diversity of the teaching units available to candidates during the M2THERV program provides them with excellent training as general toxicologists or more specialized toxicologists in regulatory toxicology.

A 3-week core program followed by one teaching unit per month

Présentation

Skills

1. Establish the relationship between identifying the hazards associated with a product and the risks associated with its use.
2. Use scientific reasoning and experimental methods (toxicity assessment models) in the field of toxicology.
3. Communicate and argue the results of your research in writing and orally in both French and English.
4. Critically analyze scientific articles and regulatory reports in order to find relevant information.
5. Understand the essential elements of regulatory toxicology for health products and know how to self-train in this field.
6. Apply essential knowledge in health product vigilance, including regulatory aspects.

Objectives

Graduates with a master's degree in Toxicology are legally authorized to perform risk assessment functions in both the pharmaceutical and cosmetics industries. Consequently, they must have all the knowledge required in the field of toxicity mechanisms, toxicity assessment methods, and related regulations necessary to perform this function.

Débouchés

Career prospects

Evaluateur de la sécurité d'emploi des produits dans le secteur industriel (santé, chimie, agrochimie, cosmétique, CRO) : directeur d'études CRO, toxicologue réglementaire

Métiers de l'évaluation du secteur public (ANSM, ANSES), Institut de veille sanitaire : évaluateur toxicologue (médicaments, biocides, cosmétiques, pesticides), chef de projet normes (VLP, VTR), directeur d'étude de toxicologie

Chargé de pharmacovigilance, chargé de cosmétovigilance, chargé de matériovigilance

Métiers dans la recherche académique ou privée (chercheur, enseignant-chercheur, ingénieur de recherche, chef de projet R&D, carrières hospitalo-universitaires) après une poursuite en doctorat

Calendar

Start of programme (indicative date)

04/09/2026

End of programme (indicative date)

18/09/2027

Admission

Capacity

Available Places

15

Target Audience and Entry Requirements

- Students who have completed a Master's 1 degree in SMPS or a related field (Biology, Biology-Health) at a university offering education comparable to that of Paris-Saclay University, in France or in European Union countries, after validation of specific prerequisite knowledge by the Master's 2 program director;

- Students who have studied health sciences (pharmacy, medicine, dentistry, veterinary medicine) in the European Union (and universities with agreements), having completed the fifth year of study or an equivalent to an M1 degree;
- Students with an engineering degree equivalent to an M1 degree;
- Be under 30 years of age to be eligible for an apprenticeship contract.
- Initial knowledge of toxicology, an academic level in the field and related fields (depending on the candidates' profile: biology, pharmacology, public health, etc.) and experience in the field of toxicology (research internships, in industry, in agencies) are required.

Période(s) de candidature

Inception Platform

From 02/02/2026 to 24/04/2026

Supporting documents

Compulsory supporting documents

Motivation letter.

All transcripts of the years / semesters validated since the high school diploma at the date of application.

Curriculum Vitae.

Detailed description and hourly volume of courses taken since the beginning of the university program.

describe in detail the Toxicology and Biology courses, with particular emphasis on the optional courses followed

Additional supporting documents

Pharmacy or engineer transcripts.

Certificate of English level.

VAP file (obligatory for all persons requesting a valuation of the assets to enter the diploma).

Recommendation letters.

Supporting documents :

- Residence permit stating the country of residence of the first country
- Or receipt of request stating the country of first asylum
- Or document from the UNHCR granting refugee status
- Or receipt of refugee status request delivered in France
- Or residence permit stating the refugee status delivered in France
- Or document stating subsidiary protection in France or abroad
- Or document stating temporary protection in France or abroad.

Programme

Subjects	ECTS	Semester	Lecture	directed study	practical class	Lecture/directed study	Lecture/practical class	directed study/practical class
V2 - Toxicologie Réglementaire 1 : définitions, principes et organisations ■	3	Semestre 1	20	5				
Charger le détail								
V3 - Toxicologie Réglementaire 2 : expérimentation et tests ■	3	Semestre 1	20	5				
Charger le détail								
V14 - Discussion avec jury sur projet et article ■	3	Semestre 1						
Charger le détail								
V13 - Présentation projet et article ■	3	Semestre 1						
Charger le détail								
M1 - Mécanisme d'action des toxiques ■	3	Semestre 1	22	3				
Charger le détail								
V7 - Toxicologie cellulaire ■	3	Semestre 1	18	7				
Charger le détail								

Subjects	ECTS	Semester	Lecture	directed study	practical class	Lecture/directed study	Lecture/practical class	directed study/practical class
M2 - Pathologies non tumorales	3	Semestre 1	19	6
