Présentation

Objectives

1- Develop business strategies to meet the demands of consumers and citizens in the food sector.
2- Model the decisions of producers (agricultural and industrial), consumer behaviour and choices, and the different strategies of agri-food companies.
3- Implement recommendations to define appropriate agricultural and nutritional policies (incentives, taxes, subsidies, standards, information campaigns) with the objective of sustainability.
4- Design experimental studies and analyse from data the behaviours of the various actors in the food sector to determine the public policies to be implemented.
5- Compare new production and consumption models linked to the circular economy (innovation, eco-design, waste management).
6- Conduct research projects in economics in food, health and the environment.
