M2 Protection and Management of Innovation in Health

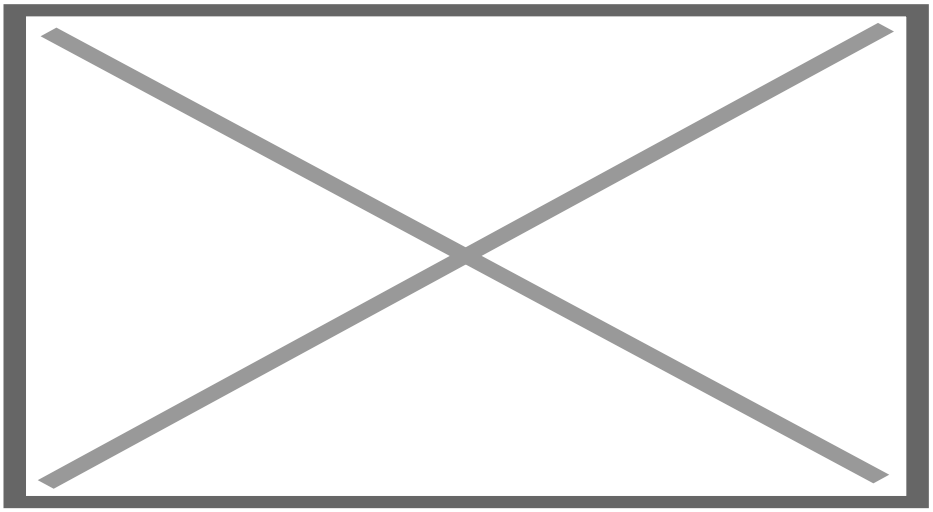

Master's degree
Specialisation Pharmaceutical Science
Enrolment type
Formation initiale
Formation en apprentissage
Formation continue
Language(s) of instruction
French

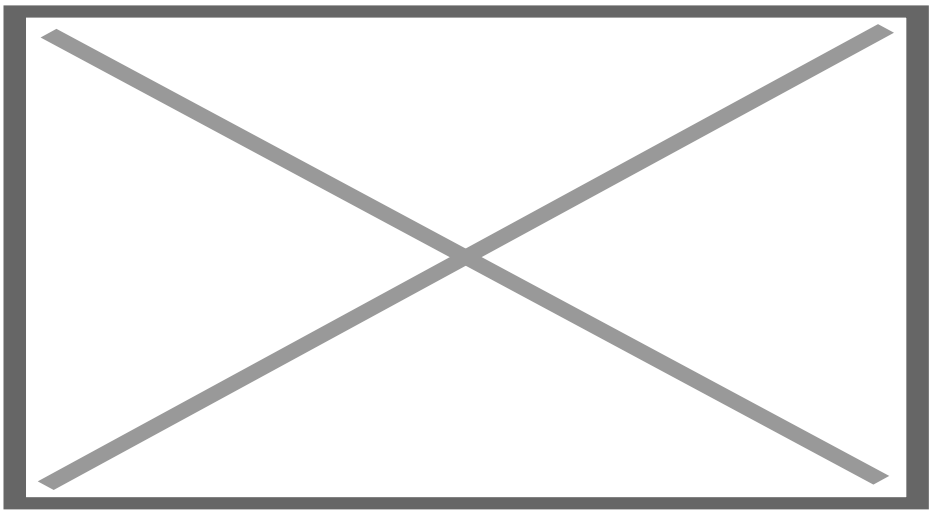

The Master 2 PIMS stands out for its unique professional orientation: it trains future managers capable of leading health innovation projects while mastering both the technical dimensions (R&D, valorization, regulatory frameworks) and the legal and economic aspects (intellectual property, technology transfer, business models, financing). This dual technical and legal expertise is highly sought after by stakeholders in the sector, both in France and internationally.

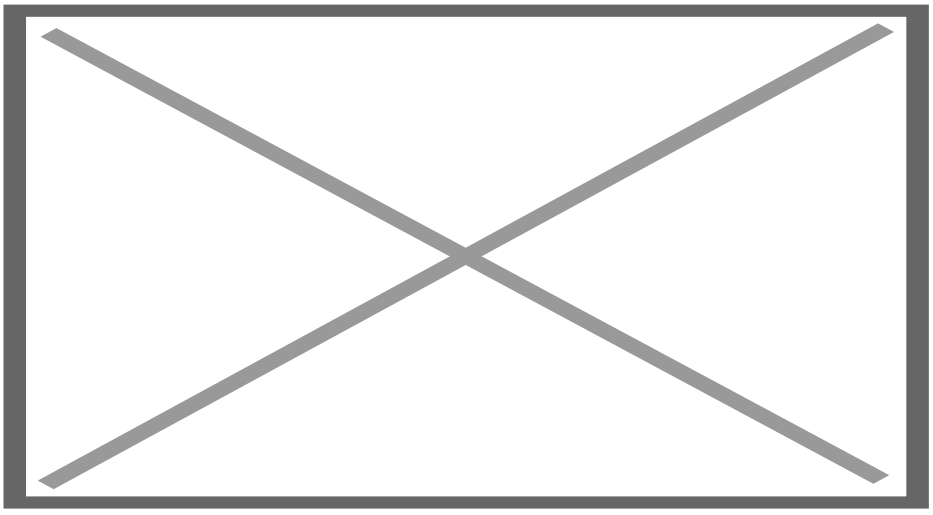

The Master 2 PIMS provides a unique professional program at the crossroads of science, law, and economics. It prepares graduates to manage health innovation projects by combining expertise in R&D, regulatory affairs, intellectual property, and business strategy. The curriculum integrates lectures, case studies, and internships, fostering strong connections with industry and research. This dual training equips students with highly valued skills for careers in innovation, technology transfer, and health management.

Présentation

Objectives

Knowing how to generate and manage innovative projects requires strong and complementary skills in technical aspects, industrial property, and technology transfer strategies. PIMS is a Master 2 program tailored to scientific, creative, and innovative talents. With a comprehensive view of the health product chain from discovery to commercialization, participants will learn how to translate discoveries into language understood by industrial property experts. The PIMS program also emphasizes the positioning of innovation in the socio-economic context of entrepreneurship. Participants will gain expertise in managing and financing innovative projects for the development of pharmaceuticals and other health products.

Débouchés

Career prospects

Regulatory Affairs Manager
Business Manager
Regulatory affairs officer in the relevant fields

Research and Innovation Manager
Project Manager
Validation/qualification Manager
