M2 Intellectual Property and Business Law

Master's degree

Specialisation Intellectual Property Law / Information Technology Law

Enrolment type

Full-time academic programmes Life-long learning

Language(s) of instruction

English French

The 2nd year Master's in Intellectual Property and Digital Business Law (2nd year Master's PID@N) trains students to master the current and future legal challenges posed by the rise of digital technologies. These challenges concern theoretical issues as well as contractual, judicial and technical practices in the sectors transformed by these developments. This 2nd year Master's programme meets a growing demand from businesses at national, European and international level.

An internship lasting at least two months is mandatory, linked to the competencies acquired in the Master's programme (an internship is usually 6 months on average). Internships abroad are possible thanks to mobility grants, and a research dissertation enables students to valorise their writing competencies and analytical abilities among future employers, and to envisage continuing their studies with a thesis. Students work on their dissertation throughout the year, supervised by one or more mentor teachers. Students also receive support in preparing for competitive exams (APRAM, CN2PI, etc.). In connection with this, speaking workshops are organised to improve students' public speaking competencies.

Présentation

Skills

Master the fundamentals.

Objectives

The Master 2 Intellectual Property and Business Law (M2 PIDAN) trains students to deal with current and future legal challenges linked to the growth of information technologies. It explores both the theoretical issues and the contractual, legal and technical practices of the sector to meet growing demands in the contemporary practice of national, European and international business law. Students will learn to identify legal strategies to promote “digital” and “intellectual” corporate heritage. To this end, the seminar programme combines basic training in business law and specialised courses for intellectual property and digital law. The programme also focuses on acquiring additional interdisciplinary knowledge, for example in the digital and economic fields. Also, some courses are given in English. Depending on their career plan, students can choose to specialise either in intellectual property law or in digital law through various optional subjects and individual work. This Master’s degree will help students develop the skills essential to professional practice and rapid recruitment. They will complete an internship and practical exercises (contract negotiation, production of writing games, participation in advocacy contests). This Master 2 also prepares students for a PhD course by encouraging individual research (writing of a Research Master thesis) and collective research (during each seminar). The students will also learn to master research tools – in particular legal databases – and be able to participate in many scientific events.

Admission

Target Audience and Entry Requirements

The programme is intended primarily for students who have acquired legal training and who demonstrate a specific interest in digital law and intellectual property law. It welcomes international students who are fluent in French. It is also open to engineering students and applicants from business or political science schools (Acquis Validations

- validated credits). Selection on a case-by-case basis (including a motivation questionnaire) and interview with a panel. Procedure available on the University of Paris-Saclay website: <https://apply-tc.ecp.fr>

Période(s) de candidature

Inception Platform

From 15/04/2026 to 15/06/2026

Supporting documents

Compulsory supporting documents

Motivation letter.

Motivational questionnaire.

All transcripts of the years / semesters validated since the high school diploma at the date of application.

M2 Summary Sheet.

https://www.universite-paris-saclay.fr/sites/default/files/2024-04/fiche_synthese_2024_mention_dpine.pdf

Curriculum Vitae.

Detailed description and hourly volume of courses taken since the beginning of the university program.

Additional supporting documents

Certificate of French (compulsory for non-French speakers).

VAP file (obligatory for all persons requesting a valuation of the assets to enter the diploma).

Supporting documents :

- Residence permit stating the country of residence of the first country
- Or receipt of request stating the country of first asylum
- Or document from the UNHCR granting refugee status
- Or receipt of refugee status request delivered in France
- Or residence permit stating the refugee status delivered in France
- Or document stating subsidiary protection in France or abroad
- Or document stating temporary protection in France or abroad.
