M2 Gouvernance de la transition, écologie et sociétés

Master's degree

Specialisations Political Science | Land Management and Community Development

Enrolment type

Full-time academic programmes Life-long learning

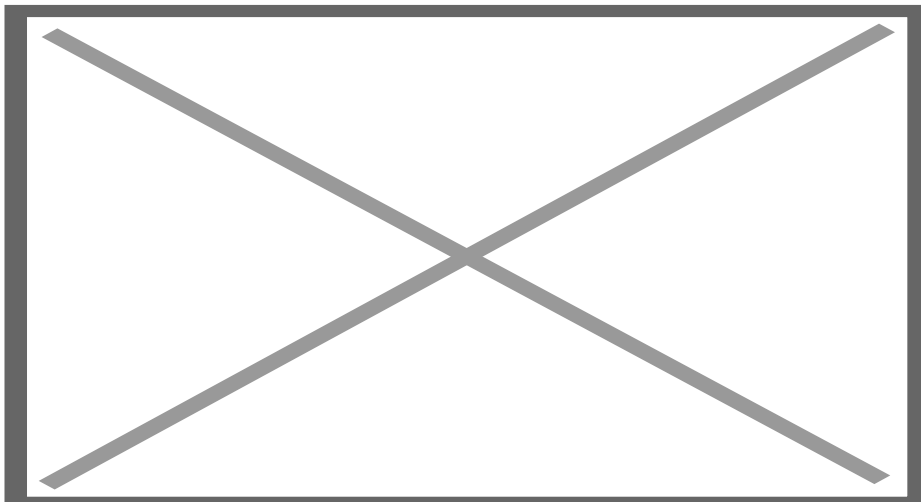

Language(s) of instruction

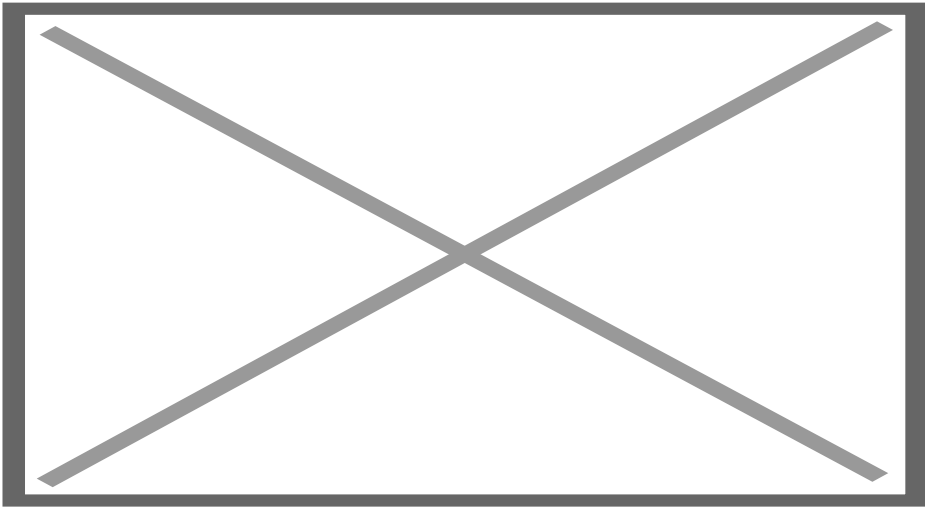

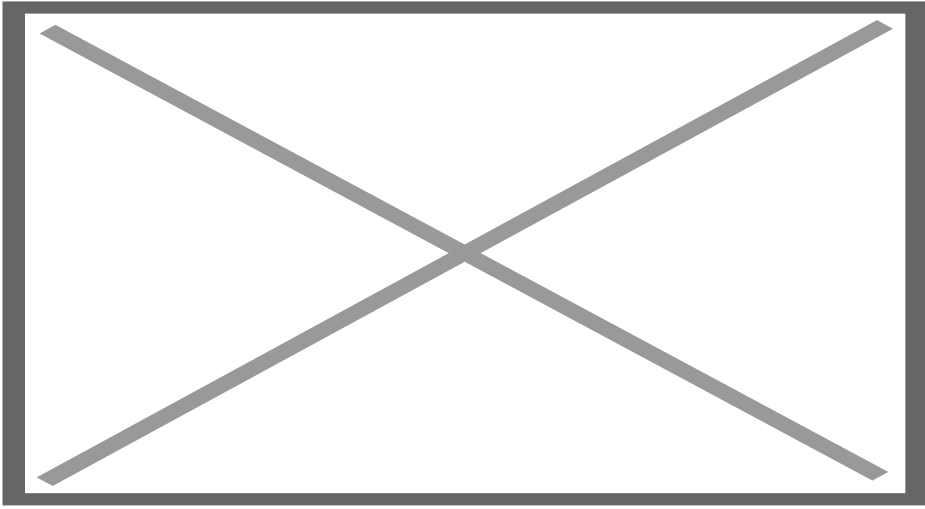

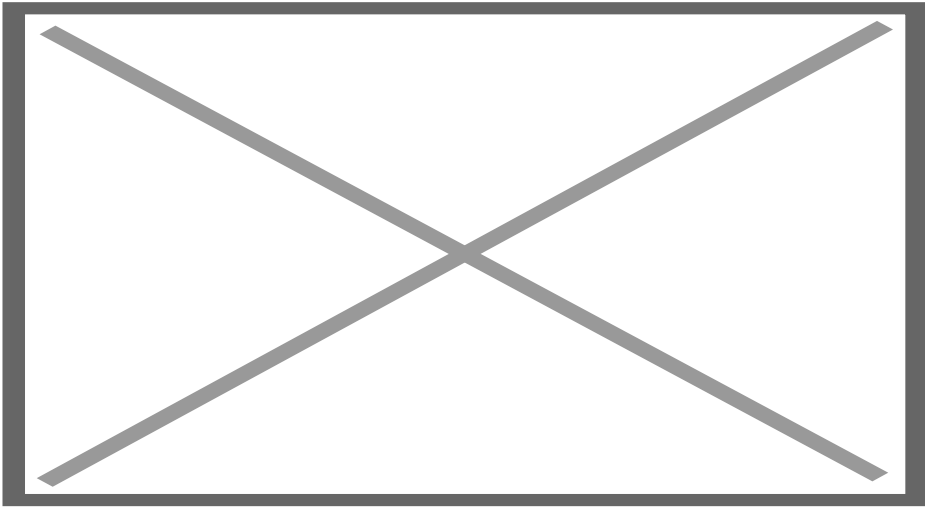

English French

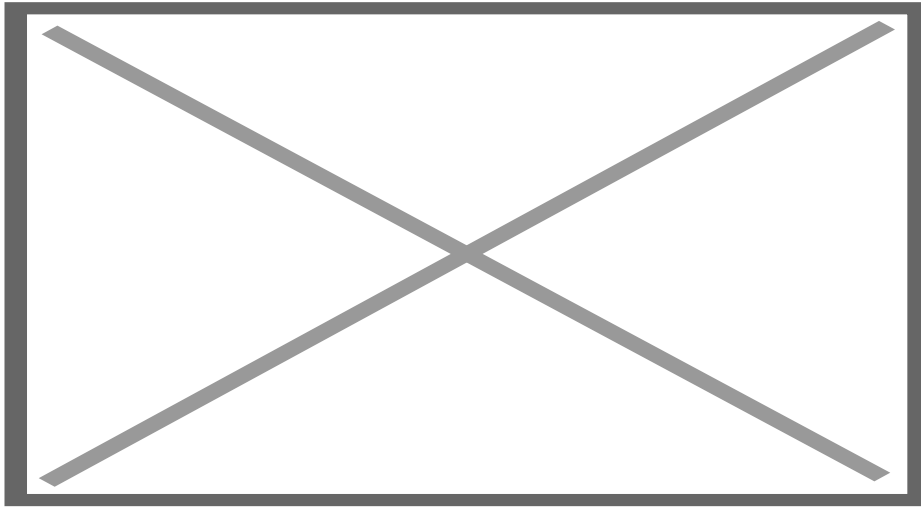

The M2 Governance of Ecological and Social Transition (GTES) aims to train project managers to create the conditions for a highly sustainable ecological transition. Students are future professionals who will be confronted with an increasingly uncertain Earth system, marked by irreversible changes (biodiversity, climate, inequalities, etc.). The M2 GTES helps to develop skills that facilitate consideration of the interactions between human and natural environments, with a view to establishing mutual co-evolution. The approach is based on the acquisition of interdisciplinary knowledge (political science, heritage strategy, ecology, law and economics) and specific methods (heritage auditing, project management, etc.).

Présentation

Skills

Mobilise highly specialised knowledge, some of which is at the forefront of knowledge in a field of work or study, as a basis for original thinking.

Identify the key elements of an ecological transition policy (complementarity of sociological, economic, legal and ecological approaches).

Conduct a reflective and detached analysis taking into account the challenges, issues and complexity of a request or situation in order to propose appropriate and/or innovative solutions in line with regulatory developments

Design, lead and monitor all operations relating to the implementation of a territorial development project that may require multidisciplinary skills in a collaborative framework and assume responsibility for them

Objectives

The M2 Governance of Transition, Ecology and Societies (GTES) aims to train project managers to create the conditions for a highly sustainable ecological transition through an interdisciplinary approach (particularly Ecology and Social Sciences) that is both theoretical and applied. Students are future professionals who will be confronted with an increasingly uncertain 'Earth' system, marked by irreversibilities (biodiversity, climate, inequalities, etc.). The M2 GTES helps to develop skills that facilitate consideration of the interactions between human and natural environments, in order to establish mutual co-

evolution. The approach is based on the acquisition of interdisciplinary knowledge (political science, heritage strategy, ecology, law and economics) and specific approaches (heritage auditing, project management). The teaching methods emphasise the confrontation of knowledge and collective work. The Master's programme can support students who wish to pursue a career in research.

Débouchés

Career prospects

After a Master's + PhD: researcher or lecturer

Environment / Biodiversity Officer

Environment / Biodiversity Project Manager

After a Master's degree: Research analyst

Further Study Opportunities

Head of development

Research officer

Project Manager

Chef·fe de projet/de mission

Consultant

PhD

Organisation management

Target Audience and Entry Requirements

Have a Master's degree in social sciences (political science, sociology, economics, geography, etc.) or in life and earth sciences (biology, ecology, agronomy, etc.) and be interested in political ecology issues. Be able to understand technical issues related to the transition. The Master's programme only accepts a maximum of 20 students. We have to review many applications... Therefore, you must prepare yours carefully (cover letter, etc.). Your results from previous years will be taken into account. It is also important to highlight the consistency between your initial background and the objectives of the programme. You can highlight the courses you have taken, your experiences abroad, internships, and also any community involvement that is relevant to the Master's programme. Finally, it is important to clearly state your professional ambitions (subject areas, types of activities, etc.). The Master's programme is open to all students who meet the equivalency requirements set by Paris-Saclay (Decree No. 2016-672 of 25 May 2016 relating to the national Master's degree).

Période(s) de candidature

Inception Platform

From 21/04/2026 to 09/06/2026

Supporting documents

Compulsory supporting documents

Motivation letter.

List of the last 5 years of studies mentioning only the year of study, the institution, the overall average and the mention obtained.

All transcripts of the years / semesters validated since the high school diploma at the date of application.

Curriculum Vitae.

Detailed description and hourly volume of courses taken since the beginning of the university program.

Additional supporting documents

Referring contact information (compulsory for non-international applicants).

Certificate of French (compulsory for non-French speakers).

Level B2 : Non native french speakers, a knowledge certificate issued by the French Embassy or a French language center. Students holding a French diploma or a diploma instructed in French are exempt from that obligation

VAP file (obligatory for all persons requesting a valuation of the assets to enter the diploma).

Recommendation letters.

Document indicating the list of local M2 choices available here : <https://urlz.fr/i3Lo>.

Supporting documents :

- Residence permit stating the country of residence of the first country
- Or receipt of request stating the country of first asylum
- Or document from the UNHCR granting refugee status
- Or receipt of refugee status request delivered in France
- Or residence permit stating the refugee status delivered in France
- Or document stating subsidiary protection in France or abroad
- Or document stating temporary protection in France or abroad.

Prerequisites

Les étudiant.es devront disposer de connaissances générales sur le fonctionnement de la démocratie représentative. L'objectif du cours étant de confronter les principes généraux de fonctionnement de la démocratie (principe représentatif, principe délibératif, prise de la décision, expertise...) avec les enjeux des contraintes environnementales (finitudes, irréversibilités, incertitudes...). Une bonne connaissance des principales dimensions des crises écologiques (climat, biodiversité, artificialisation...) est nécessaire.

Learning objectives

- Interpréter l'état des lieux, estimer les ressources et contraintes d'un territoire.
- Relier les connaissances dans une approche systémique en tenant compte de la multiplicité des représentations portées par les acteurs.
- Prioriser les actions à mener, en vue d'une gouvernance partagée.
