Présentation

Skills

Ability to fulfill all professional positions in decision making, economic analysis and expertise related to environment and climate issues

Objectives

The objective of the “Economy of Sustainable Development and the Environment” course is to offer training dealing with all environmental issues from an economic point of view. Graduates must have the skills to design strategies to address energy and environmental challenges (e.g. climate change, overexploitation of natural resources or even water and air pollution). They must be able to integrate these strategies into production, service and consulting professions. They must also have the academic knowledge allowing the most motivated to integrate private and public research. And be able to integrate national and international decision-making centers (civil service, communities, international organizations).
