Présentation

Objectives

The network industry is at the centre of today's changing economy: on one hand, it is progressively opening up to competition, which has disrupted organisations and the way their markets function, and on the other hand, it serves as the infrastructure for the entire economy. The rapid digitisation of the economy which involves networks, IT and knowledge technologies, has given rise to new industrial stakeholders and new services and modifies the way we design, produce, distribute and consume goods and services. It is important to understand this complex ecosystem, which has become a key factor in our economy.Possible jobs:
• Regulatory institution manager
• Consultants in a consultancy firm
• Companies in the Network and Digital Economy sector
• Teaching/Research
• Administrations and local governments

Admission

Capacity

Available Places

15
