Présentation

Objectives

The objectives of this program are to provide the technical and scientific knowledge necessary for design and innovation in cosmetic formulation. It enables students to acquire regulatory knowledge, as well as basic knowledge in marketing and communication, which is essential for positions in the cosmetics industry, where technical and creative fields are closely linked. This EF includes marketing studies and a supervised project entitled “Project management through the practical creation and launch of a product range,” which leads students to engage in personal development through independent, collaborative, and creative work, ranging from product range and formulation concepts to communication and marketing.

Admission

Capacity

Available Places

20
