Master's degree
Specialisation Intellectual Property Law / Information Technology Law
Enrolment type
Formation initiale
Language(s) of instruction
French

International Double Degree in Artificial Intelligence and Intellectual Property Law (IAPI)

The IAPI double degree trains jurists to address the legal challenges arising from artificial intelligence, digital technologies and intellectual property in a comparative and international perspective. Graduates are awarded both the **Master 2 (Université Paris-Saclay)** and the **LL.M. degree (UQAM)**.

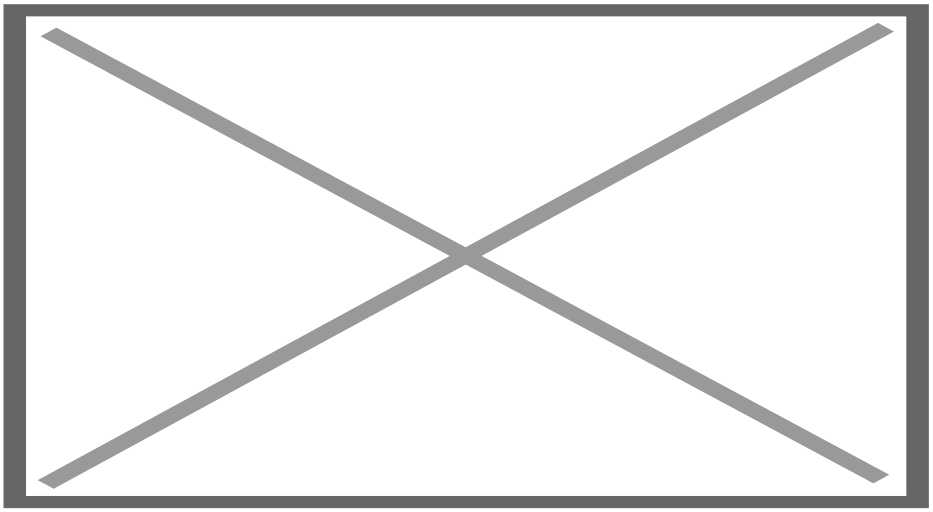

The international double degree in *Artificial Intelligence Law and Intellectual Property* (IAPI) provides a critical and comparative training in intellectual property law, digital law, and the regulation of emerging technologies.

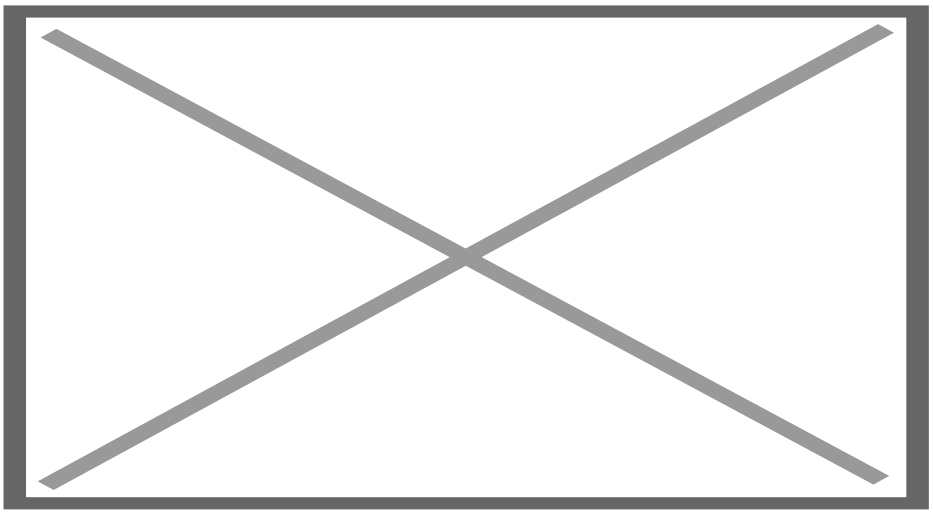

The first year, at Université Paris-Saclay, enables students to acquire solid theoretical foundations and an advanced methodology in legal analysis, complemented by additional training in Intellectual Property and Digital Law (PIDN).
The second year, completed at UQAM (Canada) within the PIDAN program, offers advanced theoretical and practical specialization in intellectual property, digital business law and artificial intelligence.

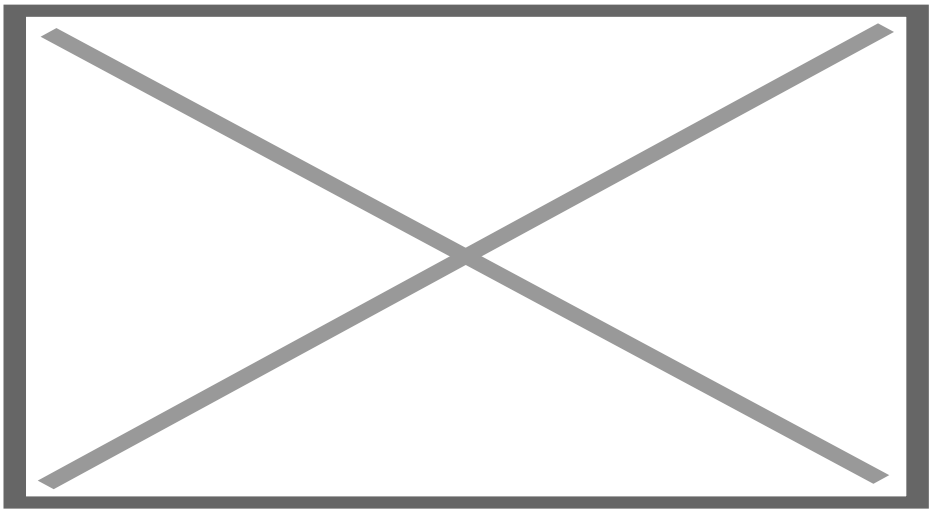

Upon completion of the program, students are awarded a **double degree**:

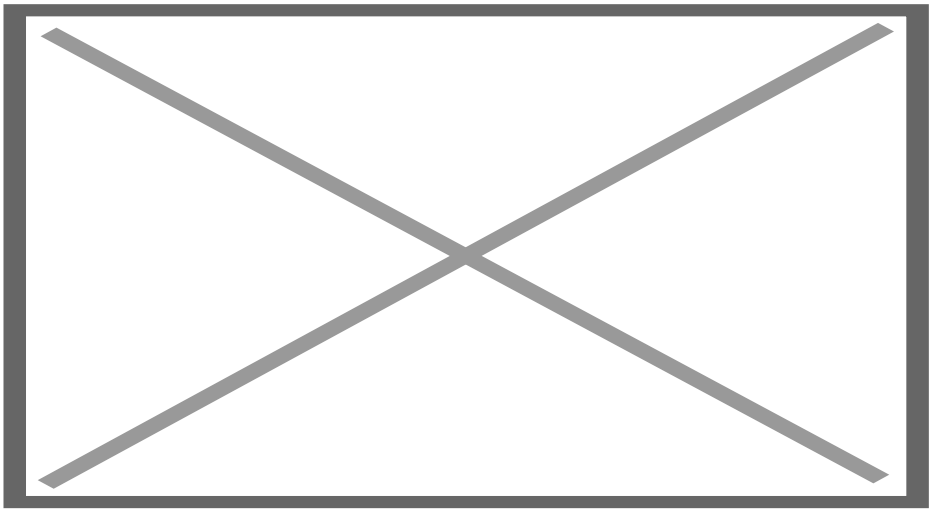

- the **Master of Laws (LL.M.)** conferred by UQAM, and
- the **Master 2** from Université Paris-Saclay.

Présentation

Skills

The program enables students to acquire an in-depth, comparative understanding of multiple legal systems, particularly the European and Canadian frameworks, with additional exposure to the American legal context. Through a full year of international mobility, it trains globally oriented jurists capable of evolving within transnational legal environments and engaging with diverse regulatory approaches in the fields of digital law and artificial intelligence.

The program also fosters **legal creativity**, encouraging students to use the tools of general law to design innovative solutions to the challenges arising from rapidly evolving technologies and digital practices. It combines a strong theoretical foundation with a practice-oriented approach, supported by professional

learning methods such as negotiation simulations, mock deliberations, moot courts, legal writing exercises, case studies and specialized publications.

Finally, the curriculum includes a **professional internship** as well as the completion of a **research dissertation — rather than a simple internship report** — which familiarizes students with the level of methodological rigor required in legal professions and demonstrates to future employers their advanced analytical, research and legal writing abilities.

Objectives

First Year

The first year aims to provide students with a solid theoretical foundation and a critical legal methodology, aligned with one of the three proposed areas of specialization: international law, law and society, or labor law. It also includes a complementary training module in Intellectual Property and Digital Law (PIDN), designed to ensure the acquisition of cross-cutting knowledge necessary for understanding the legal challenges associated with intangible assets and emerging technologies.

Second Year

The second year focuses on deepening both theoretical and practical knowledge in intellectual property law, digital law, and the legal regulation of artificial intelligence. It is part of the “Intellectual Property and Digital Business Law” (PIDAN) program offered at UQAM, and aims to strengthen students’ analytical, research, and problem-solving skills within an international legal environment shaped by technological innovation.

Débouchés

Career prospects

After a Master's or Master's + PhD: engineer (R&D, control, production, etc.)
After a Master's or Master's + PhD: researcher or lecturer
After 3rd year undergraduate ESVT and 2nd year M2E Master's: careers as primary or secondary school teachers
After a Master's or Master's + PhD: engineer (research and development, control, production, etc.) in the fields of health, pharmaceuticals, agri-food, biotechnologies, instruments and reagents, cosmetics, pollution control and the environment.

Sectors of activity: fundamental or applied research in Biology, Health or Ecology in academia or the private sector
Fields: health, pharmaceuticals, agri-food, biotechnologies, instruments and reagents, cosmetics, pollution control and the environment.
After a Master's + PhD: researcher or lecturer
After a Master's or Master's + PhD: engineer (Research & Development, control, production, etc.)
Specialised opticians in an optician's shop or other visual health establishment
Technical sales representatives in ophthalmics
Buyers (department stores, central purchasing agencies, head offices)
Assistant managers, directors or heads of marketing, communications or sales strategy
Design/research engineer in an R&D department in the ophthalmic industry
Trainer in the ophthalmic industry
Technical advisor in the ophthalmic industry
Project manager in the ophthalmic industry
Teacher in a structure preparing the Optician BTS and/or the professional optics licence
Environment / Biodiversity Officer
Environment / Biodiversity Project Manager
Expert naturalist
Regulatory Affairs Manager
Raw materials project manager or researcher
Raw materials and manufacturing quality control manager
Cosmetics innovation and formulation manager
Data Scientist
Data Manager
Platform manager
Bioinformatics Engineer (Research and Development)
Hospital Ethics Officer

Bioethics Attaché
Ethics and Deontology Coordinator
Medical and clinical ethics Advisor
Ethics and Compliance Officer
Business ethics and CSR Consultant
Ethics and Compliance Manager
Public ethics or bioethics Advisor
Technology and Artificial Intelligence Ethics Officer
Artificial intelligence and data ethics Consultant
Ethical and humanitarian programmes Manager
Head of Studies in a fundamental or applied ethics research programme, deontology
After a Master's degree: Engineer (financial analyst, economist, statistician)
After a Master's degree: Data scientist
After a Master's degree: Artificial intelligence (AI) specialist
After a Master's degree: Research analyst
R&D Engineer
Business Manager
Safety engineer
design study engineer
maintenance engineer
chemical-environmental engineer
Nuclear R&D Engineer
Assistant Accountant
Administrative officer
HR Administrative Assistant
Nutritional consulting engineer
Quality assurance manager
Perfumer - Fine or functional analyst
Sweet/savoury Aroma Specialist
Food products application Manager
Sensory analysis manager
Marketing and scientific communication managers.

R&D Project Manager
R and D Project Manager
Project officer environment
Project officer sustainable development
Research officer environment
Research officer in sustainable development
Management Controller
Financial Analysis Assistant
Back office manager
Personnel administrator
Head of Sports Department
Project Manager
Development Manager
Educational Program Development
Sports Facilities and Spaces Officer
Consulting
Sports Event Coordinator
Assistant Product Manager
Export Assistant
Chargé de clientèle
Commercial
Community manager
Responsable de magasin
Assistant marketing
Assistant chef de publicité
Design engineer in the industrial sector
Design engineer in the research / scientific sector
Design engineer industry / public research
Evaluation and Forecasting Officer
Technical, economic, strategic, and environmental research officer
Project Manager / Researcher in biodiversity and sustainable development
CSR Manager / Officer
Project and regional development officer / manager

PE teacher in secondary and higher education (PRAG EPS)
Local Administration
Political adviser
Adviser in communication
cultural project manager
cultural development manager
cultural mediator
Cultural enhancement manager
cultural communication manager/ community manager
production manager (cultural sector)
cultural events manager
Diplomacy/security and prevention professions
Legal roles in international and European organisations
Legal roles in banks and multinational companies
Legal roles in international, European and national human rights institutions and non-governmental organisations
Law firms
Corporate lawyer or legal advisor specialising in the relevant fields
Junior lawyer or legal advisors specialising in the relevant fields
Junior lawyer in industrial property, business development manager
Data protection Officer
Public affairs officer in the relevant fields
Regulatory affairs officer in the relevant fields
Corporate lawyer or junior advisor in business intelligence
Information Systems Manager
Subject to successfully completing a civil service competitive exam, graduates will be eligible for positions as design engineers or researchers in national research organisations.
Subject to passing the CRFPA exam: lawyer
Employment law lawyers in companies, associations and trade unions
Human Resource department
Editor specialising in employment law (for a legal journal, for example)

Recruitment manager
Labour inspectorate
Local government lawyer
National administration lawyer
Public company and public institution lawyer
Lawyer in a private company or association
Avocats
Administrative judge
• Concours administratifs permettant des fonctions qui ne sont pas nécessairement celles de juriste (INSP, INET, IRA…).
Notary
Notary clerk
Real estate lawyer
Wealth management advisor
Notary's associate
Legal manager in a notary's office
In the private sector: specialised lawyer (medical litigation, personal injury), executive in health law (companies, insurance companies, mutual insurance companies, contract production and claims departments), corporate lawyer in the pharmaceutical
In the public sector: hospital director (after passing the EHESP competitive exam), directors of social and medical-social establishments, health and social affairs inspectors, senior social security managers (ENSSS competitive exam).
Judicial mediator
Litigation department manager
Corporate lawyer
Lawyer (with CRFPA diploma)
Project manager in the associative sector, local government
Students can legitimately aim for all private law professions
Judicial professions: lawyers, magistrates, judicial commissioners
Corporate lawyers and government lawyers
Notaries, Police commissioners, Judicial police officers, Customs officers

Academic staff
Design Engineer
Research & Development Engineer
Research and Innovation Manager
Project Manager
Validation/qualification Manager
Production Engineer
• Chargé·e de communication scientifique, veille technologique ou transfert de technologie
Project manager in biotechnologies, biotherapies or healthcare innovation
Scientific communication, technology watch or technology transfer Officer
Secondary school teacher
Research & Development Engineer
Study coordinators or project managers in clinical research
Specialised Master's programmes (MBA in Project Management, Business, and Innovation Management in the Bio-industries)
Agricultural services, environment or sustainable development, local authority planning or government services
Agricultural development or nature protection/conservation organisations and associations
Engineering firms specialising in environmental impact assessments
Private-sector companies, including agricultural production
Head of a territorial department
Economic development officer
Project and territorial development officer
International relations project manager
Economic and statistical analyst
Researcher in economics
Socio-economic studies and foresight
Management of sustainable development
Project manager in sustainable development and regional/spatial planning

CAD Designer Technician
Integration Technician
Manufacturing Process (CAM) Technician
Production Technician
Quality Control / Inspection Technician
Quality Process Technician
Mechanical Testing Technician
Product Development Technician
Industrial Development Manager
Healthcare Product Manager
Healthcare Regulatory Affairs Manager
Cultural outreach professions
Journalism and music criticism professions
Professions in performing arts administration
Music and performing arts programming Manager
Cultural action and outreach Officer
Head of cultural services
Professional musician
Laboratory Manager
Head of service
Archivist
Records manager
Research or Design Engineer
Digital transformation consultant
Magistrate
Lawyer
Registrar
Director of registry services
"The ""Criminal Law and Criminal Sciences"" track prepares students for all judicial and quasi-judicial professions related to criminal matters."
Director of Judicial and Youth Protection Services
Prison officer and director

Lawyers within local governments (municipal councils, municipal associations, town halls, etc.)
Corporate lawyers
Graduating from one of the Business Law tracks opens up a wide range of career options, including the following:
Regulatory agencies
Property management and development companies
Writing and creative professions
Writing workshop coordinator
Author
Rewriter
Biographer
Consulting author
Screenwriter
Lyricist
Proofreader-editor
Research professions
Lecturer (after a PhD)
Design Engineer
Research Engineer
Specialist Editor
Cultural journalist
Cultural professions
Publishing assistant
Digital editing assistant
Web editor
Teacher (after the CAPES or 'agrégation' competitive exam)
Ergonomics
Ergonomist, consultant ergonomist
Occupational/industrial risk prevention ergonomist
Human-computer interaction ergonomist - HCI
Industrial ergonomist
Ergonomist in charge of keeping disabled people in employment
Ergonomist in the scientific research field

Human factors ergonomist
Product and service ergonomist
Head of mission / projects
Prevention officer
Human and Organisational Factors Specialist (FOH)
Design Engineer
Research Engineer
Development Engineer
Design-Production Engineer
Human Factors Engineer
Risk Assessor
Health-environment engineer
Drinking water sanitary risk control engineer
Healthcare project engineer
Sanitary engineering designer
Scientific / public health project manager
Scientific expertise coordinator
Regulatory toxicologist
Environmental epidemiologist
Health and safety coordinator
HSE project manager
Consultant
Executive in public health investigation and expertise
Integration of a health agency, animal health epidemiosurveillance platform, etc.
Integration of a professional institute, epidemiology units of reference centres/laboratories, pharmaceutical industry
Network or programme coordination
Project follow-up and evaluation manager
Coordination of studies in an agency or research institution
Research statistician
Public health researcher
Prevention project manager
Project follow-up and evaluation manager

Health network coordinator
HSE research (analysis, toxicology, microbiology)
Environmental health risk assessment and management support
Hospital Ethics Officer
Bioethics attaché (in health agencies, research institutes)
Ethics and deontology coordinator (in EHPAD, medical-social establishments)
Ethics and compliance officer (in companies, banks, insurance companies)
Ethics and compliance manager (in particular in sensitive sectors such as finance, law and new technologies)
Public ethics or bioethics advisor (on ethics committees, CNIL, CCNE, etc.).
Technological and artificial intelligence ethicist (in digital companies and specialised start-ups)
Ethical and humanitarian programmes Manager (in NGOs, foundations)
Data scientist
Epidemiologist
Associate professor in secondary school and college
Associate professor in the 2-year preparatory course for a competitive exam, at a university or at a scientific institute
Healthcare professionals who, on completion of the Master's programme, set up ethics structures within healthcare and medical-social establishments.
Healthcare professionals use their training in ethics in their healthcare pracitce (decision-making support, etc.)
Network architect
Project manager
Integration specialist
Development engineer
Technical support engineer
Validation engineer
Project management support

Telecoms consultants
Network administrator
Design engineer
Decision-making engineers
Application integrators
IT administrators
Head of a sports department
Head of project/mission
Head of development
Educational project developer
Research officer
Consultant
Sports events officer for a local government
After Master and PhD : reseacher or assistant professor or professor
Certified teacher in secondary school and college
Trainer of trainers
Higher education teaching staff
Secondary school headteacher
Schools inspector in Life and Earth Sciences
Property master in the film industry
Supervisor for children with disabilities
Schooling supervisor
Supervisor, activity coordinator, educational assistant
Buyer
Real estate activities
Administrative assistant
Systems and network administrator
Administrative agent
Reception agent
Authorisation agent
Communication agent
Packaging agent
Sport and health development agent

Hotel supervisor
Fire safety officer
Maintenance agent
Commercial station agent
Accounting assistant
Rights ambassador
Care centre ambassador
Analyst
Quality control analyst
Business analyst
Data analyst
Risk analyst
Financial analyst
Document management analyst
Performance analyst
Quantitative analyst / Quant
Coordinator
Sustainable food coordinator
Social centre coordinator
Environmental coordinator
Animator and coordinator
Nature coordinator
Extracurricular activity coordinator
Sports coordinator
Technical coordinator
Pedagogical assistant
Purchaser
Architect
Interior designer
Industrial architect
Landscape architect
Network architect
Garden crafts
Artist

Assistant - maintenance engineer
Data protection assistant
Administrative assistant
Administrative and financial assistant
Hearing aid assistant
Ticketing assistant
Assistant IT Project Manager
Education assistant
Communication assistant
Management assistant
Judiciary assistant
Event Logistics assistant
Production assistant
Project assistant
Research assistant
Education assistant
Assistant agronomic experiments officer
Assistant engineer
Research engineer assistant

Zootechnician
Developed on a bi-disciplinary format, its students will have
International regulatory affairs manager in the healthcare or consulting industries
Legislative and regulatory watch officer
Evaluator in national or international institutions
Head of a sports department
Head of project/mission
Head of development

Educational project developer
Research officer
Consultant
Sports events officer for a local government
Investigator in various fields of sociology
Assistant demographer
Human resources assistant
Project manager in the training and employment sector
Social development agent
Integration advisor
Administrative officer in a national or regional public administration
Elective political professions assistant
Public policy evaluation assistant
Support staff for social institutions
Editing assistant

Further Study Opportunities

Master of Agrosciences, Environment, Territories, Landscape, Forest
Master of Bioinformatics
Master of Biodiversity, Ecology and Evolution
Master of Ergonomics and Human Factors
Master of Microbiology
Master of Education and Teaching Professions
Master of Neurosciences
Master of Nutrition and Food Science
Master of Pharmaceutical and Health Products Sciences
Master of Vision Sciences
Master of Environmental Engineering
PhD in Chemistry / Biology
Continuation of studies at Master's level in all Earth Sciences disciplines, environment, geomaterials
Master of STePE and other Master of Earth Sciences

PhD
Master in Mathematics
Master in Economics
Master’s in Mathematics
Master’s in Economics
Business school
HR Administrative Assistant
Customer Relationship Officer
Customer Advisor
Specialised Master's
Research dissertation
PhD thesis
Bar school
Judicial Academy
Further curricula in innovation management
"Students could continue their studies in the 2nd year Master's ""Fundamental Criminal Law and Criminal Law Practice""."
Among other things, the curriculum would also be intended to prepare students for the bar exam, the competitive exam for the judiciary and the competitive exam for the National Police and the National Gendarmerie.
Students will be able to sit the entrance exam for law schools or take the competitive exam for the labour inspectorate.
Graduates can be recruited under private or public sector employment contracts, but can also take part in public sector competitive exams and professional examinations.
Thanks to an agreement signed on 22 December 2023 between Université Paris-Saclay and the Institut national des formations notariales (INFN), a Master's degree in notarial law will allow students to directly enrol at the INFN. This will allow students to
Students with a 2nd year Master's degree have the possibility to pursue doctoral research.
Students with a 2nd year Master's degree will have an exit profile, enabling them to master the guiding principles of healthcare law, and to specialise in all areas involving the liability of healthcare

professionals.
Be open to related sectors, understand the environment of the healthcare professions, master the regulations applicable to healthcare products, and advise promoters of scientific projects to help them valorise their projects.
Ensure the protection of healthcare data and compliance with research and development regulations
Students in this track can turn to research at the end of the 2nd year Master's.
Concours ou obtention d’un examen ou d’un certificat complémentaire d’une poursuite d’études dans les domaines suivants : Avocat ; Magistrat ; Greffier ; Commissaire de justice ; Conseiller pénitentiaire d'insertion et de probation ; Directeur de service pénitentiaire d'insertion et de probation ; Directeur d’administration pénitentiaire ; Officier et commissaire de police
Students can continue their studies with a 2nd year Master of private law.
Enter all private law professions: magistrates, lawyers, court commissioners, court registrars, police commissioners or officers, national gendarmerie, litigation departments of public authorities and private companies.
Students can go on to study at the Bar, the Judicial Academy, further studies in innovation management, doctoral programme, etc.
Master of Sociology
Master’s in Political Science
Master of Teaching Professions
Master of applied physics
Master of Innovation Management
train international specialists, producing competitive work within reputable teams from public scientific and technological institutions (EPST), in particular the French National Institute of Health and Medical Research (Inserm) and French National Centre
Master’s Degree in Engineering or Mechanical Engineering

Engineering School specialized in Industrial Engineering or Industrial Logistics
Degree in international industrial property studies
1st year Master's Business Law students generally go on to a 2nd year Master's, although they can also choose a different track.
The in-depth teaching in statistics, machine learning and applied mathematics provides students with the solid foundations they need to pursue a doctoral thesis.
fields of statistical learning, artificial intelligence and advanced data analysis
In particular, this track prepares students for applied research activities, usually undertaken after a PhD, whether in academia or in R&D.
the curriculum also enables students to enter the corporate world directly after their graduation, in positions such as Data Scientist, Data Analyst or Machine Learning Engineer.
Graduates then have the competencies expected in rapidly evolving sectors such as tech, finance, healthcare and energy.
Data Scientist, Data Analyst, Ingénieur·e en Machine Learning dans des secteurs innovants (tech, finance, santé, énergie, etc.) ;
Poursuite en thèse en apprentissage statistique, mathématiques appliquées ou intelligence artificielle ;
R&D researcher or data modelling and analysis expert in leading-edge companies or laboratories.
Continuation to 2nd year Master's MPNC (Natural raw materials for cosmetics)
2nd year Master’s
Associate professor in secondary schools and colleges
Associate professor in the 2-year preparatory course for a competitive exam, or at a university or a scientific institute
Head of project/mission
Head of development
Educational project developer
Research officer
Consultant

Sports events officer for a local government
PhD bio
2nd year Master's Neurological Disability
M2 Systems Neuroscience: from cells to physiopathological brain functions
M2 Systems and Synthetic Biology
M2 Human Genomics In Biotherapy, Health and Disease
2nd year Master of Reproduction and Development
2nd year Master's Surgical sciences and new interventional technologies

Target Audience and Entry Requirements

The program is intended for applicants holding a first-cycle degree in law (a Canadian Bachelor of Laws, a French *Licence en droit*, or an equivalent qualification), with a minimum cumulative GPA of 3.2/4.3. Applicants must demonstrate sufficient proficiency in spoken and written French, as well as a solid command of English. Applications from candidates with a GPA below 3.2/4.3 but above 2.8/4.3 may also be

considered, where justified by other elements of the application, such as a demonstrated interest in the program or the strength of the applicant’s academic record.

Période(s) de candidature

Inception Platform

From 30/01/2026 to 30/03/2026
