LDD1 Sociologie et Science Politique

Licence Double-Diplôme (Undergraduate double degree)

Specialisation Sociologie, Science politique

Language(s) of instruction

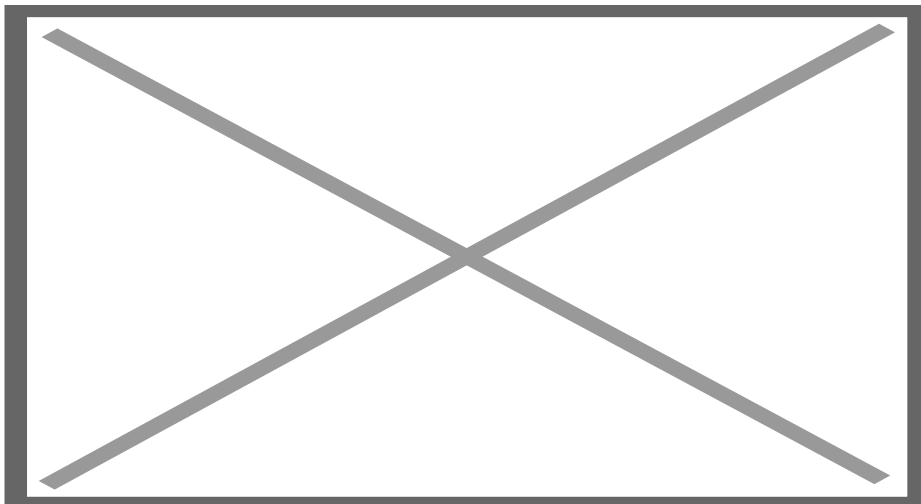

French

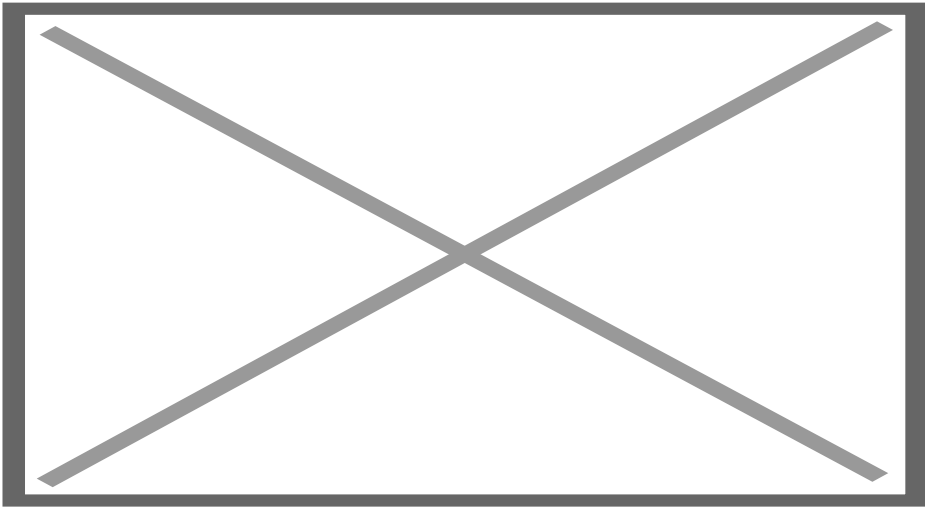

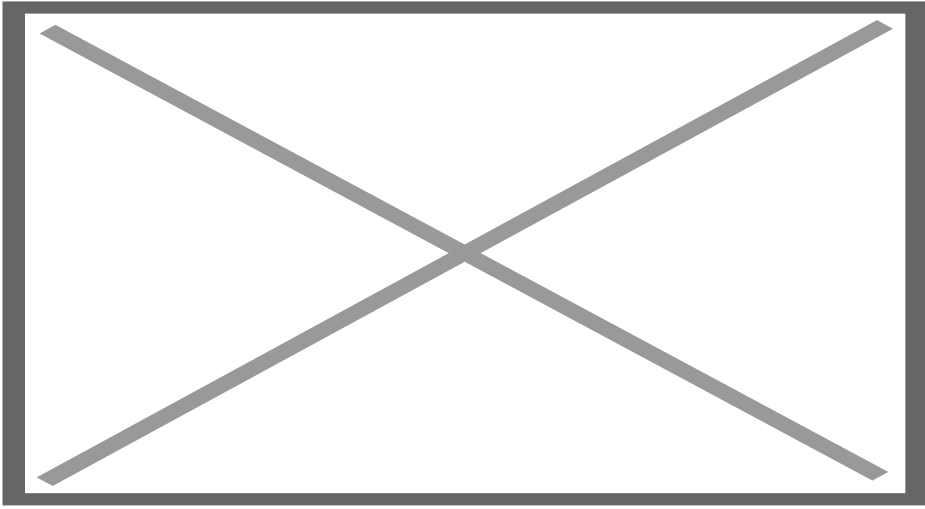

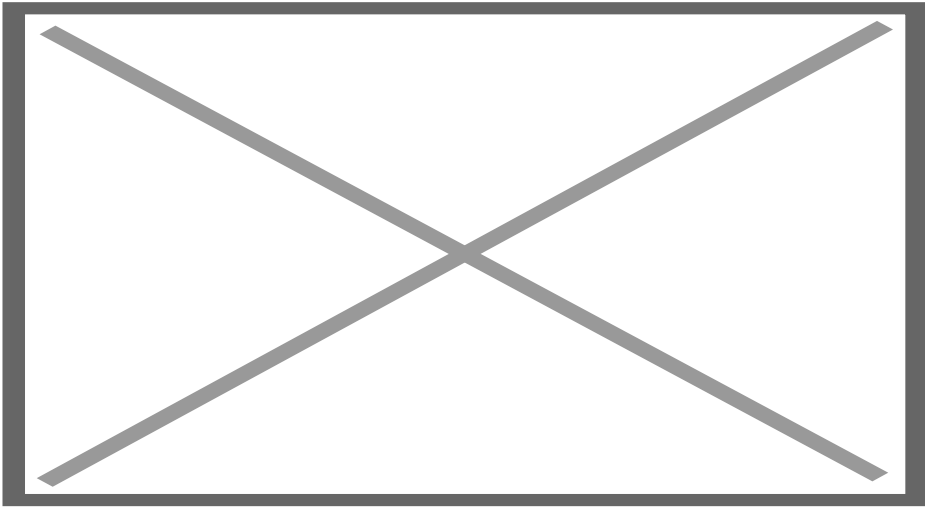

The dual degree (LDD) in sociology and political science offers a dual-discipline program combining two social science disciplines. It provides students with a solid foundation in the analysis of social and political phenomena (labor, the environment, public policy, social movements, political life, etc.). It also stands out for its advanced teaching of qualitative and quantitative social science methods.

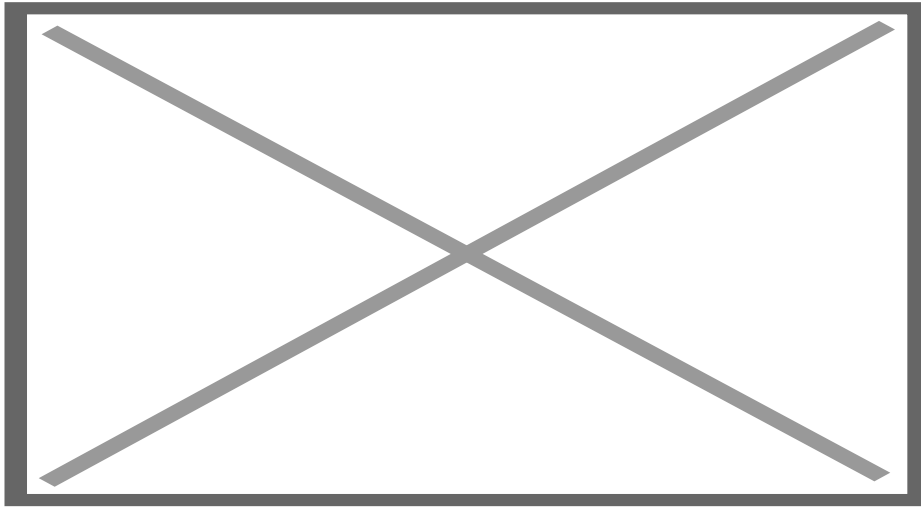

The Sociology-Political Science LDD is based on the teachings of two bachelor's degrees, the bachelor's degree in sociology and the bachelor's degree in political science, and awards 240 ECTS credits. During the program, students address a variety of contemporary social and political issues (work, organizations, cities, the environment, economic life, political life, the functioning of the state, public policy, gender, political ideas, etc.). The program combines theoretical disciplinary knowledge with methodological knowledge. Students are trained in qualitative methods (interviews, observations) and quantitative methods (questionnaires) and data analysis. Additional introductory courses are offered (language, career discovery, etc.).

Présentation

Skills

- Understand and identify political, administrative, and social actors at the local, national, and international levels.
- Report on the realities and practices of public policies, and the actions of organizations, groups, and political, union, and non-profit movements at the local, national, and international levels.
- Apply the methods, tools, and theories of political science and sociology.
- Contribute to projects with diverse audiences and in different contexts, drawing on expertise in sociology and political science.
- Conduct and interpret field surveys using the main theories and tools of the social sciences.
- Use data from public statistics and research.
- Research, collect, and synthesize information on social and political issues using various sources, identifying and reporting the sources and status of the data used.
- Draft a wide variety of written documents (summary notes and articles, interview and observation reports, thematic files, articles, etc.).
- Produce and communicate regular progress reports on a project to various sponsors, partners, and decision-makers.
- Analyze a question and develop a problem statement and action proposals by drawing on key theories.
- Define and refine a problem statement and a survey methodology tailored to a specific assignment.
- Analyze, with a scientific mindset, the functioning of contemporary or ancient societies, both near and far.
- Identify problematic situations in the field and at the institutional level, and participate in the diagnosis of identified problems.
- Provide advice, taking into account the situation of individuals, institutions, and groups.

- Participate in the formulation of action strategies and operational proposals, particularly in terms of decision-making support, lobbying, and representation.
- Provide support for decision-making (public, political)
- Use leading digital tools
- Express and communicate orally, in writing, and in at least one foreign language
- Position yourself in a professional field

Objectives

- Own theoretical knowledge of sociology and political science in various subfields.
- Understand social and political dynamics at the local, national, and international levels.
- Understand recent developments in the contemporary world (changes in work and employment, the rise of environmental issues, changes in state regulations, upheavals in the political arena, etc.).
- Acquire a critical and analytical mind with regard to transformations in the social and political world
- Design and conduct surveys using questionnaires, interviews, and observations
- Contribute to the production of original scientific knowledge on social and political phenomena
- Participate in project management and implementation.
- Assist in the design, management, and implementation of public policy.
- Conduct socio-political studies (quantitative and qualitative).
- Use the tools of academic research.
- Understand and discuss research conducted in English.

Programme/contents

Le principe de cette UE consiste à partir d'une question de sociologie, pour montrer de quelle manière l'œuvre d'un grand auteur permet d'apporter des réponses. Trois grandes questions seront traitées au cours des deux semestres :
 Comment se reproduisent les inégalités sociales ? (auteur : P. Bourdieu) Comment les acteurs sociaux produisent des effets autres que ceux qu'ils recherchaient ? (auteur R. Boudon). Comment les mouvements sociaux peuvent transformer la société (auteur A. Touraine).

Programme/contents

Cet enseignement vise à présenter aux étudiants les approches quantitatives à partir des inégalités sociales qui structurent la société. Il s'agit à la fois d'un enseignement d'introduction aux premiers outils statistiques de lecture et de mesure des inégalités, mais également de réflexion autour des enjeux liés aux approches quantitatives.
