## About EUGLOH

EUGLOH brings together nine comprehensive, research-intensive universities from across Europe around a shared mission: **advancing equitable health for people and their ecosystems.**

The Alliance focuses on **addressing transnational health challenges** through innovative, interdisciplinary solutions while **building foundational research expertise** and **training the next generation of global health experts** across all academic fields, from medicine to arts and humanities and from artificial intelligence to sustainability.

## Opportunities

### For students

Courses, workshops, summer schools, internships and conferences - online, hybrid and in-person. Long- and short term international experiences abroad and at home.

### For academics & researchers

Transnational exchanges and cooperation with international researchers across disciplines, building towards joint programmes and research projects. Joint Doctoral Supervision programmes, Guest Lecturer Programmes, and more.

### For admin staff

International experiences through staff weeks, job shadowing and courses to expand intercultural skills and share best practices.

## EUGLOH's vision

EUGLOH is structured around three strategic priorities:

- **Future-proof professionals:** equipping students and staff with the skills needed to shape the future of global health
- **One transnational campus:** creating a seamless, inclusive European campus that enables mobility, joint learning opportunities, and shared infrastructures
- **Societal challenges in global health:** addressing pressing health issues through interdisciplinary, co-created education, research and innovation that engages with societal needs

## For you, for Europe

EUGLOH is more than just a university alliance — it's part of a shared European effort to connect education, research, and innovation across borders and helps build strong partnerships between institutions across Europe.

This work supports broader goals like the European Education Area and the European Research Area, which aim to make learning and research more open and accessible for all.

Through the FOREU4ALL community of practice, EUGLOH also joins forces with other alliances to help shape the future of higher education and research in Europe, making sure voices from across the continent are heard.
