Master's program International track Infectiology

PROGRAM

LSH International Track Infectiology (Biology of infectious diseases) is a 2-year Master program delivered jointly by University Paris-Saclay (France) and University of Health Sciences, Phnom Penh (Cambodia). Students will need to validate 60 ECTS (European Credit Transfer System) during each of the two academic years to complete the Master program. A free online upgrading course (M0) can be mandatory prior to the selection of candidates to ensure they have appropriate qualifications for enrolment. The selection committee will inform the candidates accordingly.

APPLICATION PERIOD

-From February 1st to July 31st 2021: Candidates Application
-From March to September 2021: Candidates Selection
-Mid-October 2021: Start of the Academic year (full-time program)
Candidates must submit their application **before April 21st 2021** if they want to be considered for the IDEX scholarship program.

GOALS

The aim of the Master's program Infectiology is to provide a solid and broad-based foundation in prominent areas in Life Sciences and Health, as well as a high level of competences in Infectiology. Pedagogical team includes specialists from reputable international universities and research institutes. Coupled with an intensive internship period in top level research labs (Institut Pasteur, Institut Pasteur du Cambodge, Université Paris-Saclay, University of Health Sciences, etc...), students will obtain both theoretical and practical experience in Infectiology. Graduates will be able to pursue careers in basic and applied research in public or private institutions as engineer or as researcher after completing a PhD.
