The doctoral program Life Sciences and Health is based on the three doctoral schools Biosigne, CBMS and SDSV. It covers all aspects of biology from the molecular level to organisms. It aims to address, through experimental and/or in silico approaches, questions concerning the structure and molecular mechanisms of living organisms from the most fundamental aspects to applications. The latter concern the field of environment, biotechnologies and health, for example cancer, immune response and neurological and neurodegenerative diseases. It also encompasses projects concerning the evolution of living organisms.
